EXPERIENCE

Nouveau Elevators

AI Engineer, Full-Stack & Applied AI

Aug. 2026 – Present

Long Island City, NY

- Partnered with finance stakeholders to define billing requirements and shipped a production system for approvals, invoicing, and payment tracking using React, Node.js, and PostgreSQL.
- Built and deployed an AI assistant for form entry and human-approved worker assignments, cutting workflow time from ~5 minutes to ~30 seconds (~90%); incorporated source citations and role-based data access.
- Identified support-workflow gaps and built request intake, routing by service-level targets, on-call escalation, notifications, and manager reporting to track unresolved customer requests.

Johns Hopkins IT Consulting Lab

AI Product Consultant, PracticeLink & Ridgeline Agency

Jan. 2026 – May 2026

Washington, DC

- Designed AI upskilling curriculum and built PracticeLink's learning-path builder, tailoring training to department, skill level, task, and data sensitivity with governance-review guidance for restricted data.
- Built Ridgeline's six-dimension, 100-point support-readiness diagnostic and strategy hub, recommending AI, hybrid, or human-led support; incorporated stakeholder feedback into client demos.

Johns Hopkins University

Social Media Head | Instagram | LinkedIn

Sep. 2025 – Jul. 2026

Washington, DC

- Led Instagram content strategy for an account with 12K+ followers and managed a 50K-member LinkedIn community; coordinated with faculty and administrators on content for students, alumni, and industry professionals.

Extern Inc. (Paragon One)

AI Product Management Extern

Dec. 2023

Remote

- Analyzed customer feedback and user behavior to identify pain points; translated findings into engineering requirements and stakeholder documentation to inform product-roadmap decisions.

Krutrim SI

AI Prompt Engineering Intern

Aug. 2023 – Nov. 2023

Bengaluru, India

- Built and evaluated prompt datasets across four Indian languages for LLM fine-tuning and bias analysis; presented findings to senior stakeholders to guide response-quality and safety improvements.

EDUCATION

Johns Hopkins University, Carey Business School

M.S. in Information Systems and AI for Business

Aug. 2025 – Aug. 2026

Washington, DC

Vellore Institute of Technology

B.Tech. in Computer Science and Engineering (Business Systems)

Apr. 2021 – May 2025

Vellore, India

PROJECTS

AuraPath | Accessible Navigation | Slides

2025

- Led a five-person team to build an iOS navigation prototype for visually impaired users using LiDAR, computer vision, and sensor fusion; tested with intended users and earned a 100/100 project score.

FinRAG Analyst | Financial Research | GitHub

2026

- Built an SEC-filings question-answering app with source citations, company and filing filters, and live ingestion progress; combined document retrieval and reranking to let users inspect evidence behind answers.

SKILLS

Product: Product strategy, product requirements, user research, prototyping, stakeholder communication

Analytics: SQL, Python, Tableau, Excel, data analysis, qualitative feedback analysis

AI & Delivery: AI workflow automation, responsible AI, LLM evaluation, cross-functional collaboration
